Wendy,

See the attached file showing the UTLs for A72. The UTL statistic is shown for each distribution that fit the data. Please let me know if you have questions or would like to see the information presented in a different way.

I'm not sure how meaningful the same statistics would be for A68 (upstream of the impacts) and CC48 (Cement Creek above Animas River), but can do those also if you like.

Sorry it took awhile, I had a few fires to put out since talking to you this morning.

Jan
